PROFESSIONAL SUMMARY

Computer Technology student at The Technical University of Kenya with strong foundations in software development, computer networking, and cybersecurity. Possesses practical experience through academic and personal projects involving web application development, network design, and security analysis. Demonstrates knowledge of Blue Team cybersecurity concepts, including SOC operations and incident response. Passionate about securing systems and networks while continuously expanding technical and analytical skills in cybersecurity and information technology.

TECHNICAL SKILLS

Programming: PHP (Laravel), Python, React.
Databases: MySQL, Oracle
Tools: Wireshark, Packet Tracer, eNSP, Git, GitHub.
Networking Infrastructure: IPv4/IPv6 Addressing & Subnetting, Network Design & Implementation, Routing & Switching Concepts, VLANs and Inter-VLAN Routing, DHCP & DNS Configuration, Network Troubleshooting.
Defensive security foundations: Network Security Fundamentals, Security Control Implementation, Access Control Lists (ACLs), Firewalls and Basic Security Policies, Secure Network Architecture Principles, SOC Operations Frameworks, Log Analysis, Traffic Analysis (Wireshark), Incident Response Basics
Soft Skills: Problem-Solving, Analytical Thinking, Attention to Detail, Team Collaboration, Continuous Learning.

EDUCATION

The Technical University of Kenya

Bachelor of Technology in Computer Technology

- Expected Graduation: November 2026

CERTIFICATES

Google Cybersecurity Certificate

CCNA: Introduction to Networks (ITN) – Cisco Networking Academy

CCNA: Switching, Routing, and Wireless Essentials (SRWE) – Cisco Networking Academy

CCNA: Enterprise Networking, Security, and Automation (ENSA) – Cisco Networking Academy
